

FlexiGRAFT[®]

Patellar Tendons

Clinical Overview

FlexiGraft patellar tendons can be used for ACL or PCL Reconstruction procedures

Applications

- ACL Reconstruction
 - PCL Reconstruction
-

Why Use

- **Convenience:** No time-consuming harvest required. Pre-shaped grafts eliminate prep time and further increase operating room efficiency
 - **Appropriate for ACL:** Considered gold standard
 - **Patient-Friendly:** Eliminates donor site morbidity and associated pain from autograft recovery. This makes the procedure less invasive and potentially decreases OR time. Less OR time can mean less time under anesthesia and less tourniquet time¹
 - **Sterile:** Patellar tendons are sterilized using proprietary and patented Allowash XG[®] technology. This provides a sterility assurance level (SAL) of 10⁻⁶, without compromising the construct's inherent biomechanical properties
